

Plunger

YT-24983

Designed to unblock toilets, washbasins, shower trays and bathtubs. It enables effective removal of any blockages, including those impossible to remove by chemicals. Particularly useful in the event of blockages causing complete clogging of drains.

- coil made of galvanized spring wire and finished with a durable steel spring, which ensures long-term effectiveness in shredding and crushing the resulting blockages
- 73 cm working length and 9 mm diameter work well in narrow and hard to reach spaces
- recommended for use in households as well as by professionals in plumbing services, water supply plants, technical emergency services
- ergonomic handle
- easy to use
